

JOIN US FOR THE HEAVENS DECLARE DVD SERIES

Beginning Wednesday, January 5th we will begin a new video series dealing with a biblical and scientific view of astronomy and the origin of the universe. The series will be a combination of 17 videos produced by *Answers In Genesis* on the topic. You will be able to explore the different views about the origin of the universe and why we are here. There are 17 Lessons which includes the 12-part series *The Heavens Declare* showcasing compelling evidence for a universe created by God just a few thousand years ago. Experts in astronomy, astrophysics, and cosmology build their case for a biblical worldview covering all the main areas of astronomy. We will have dinner at 6:00 PM followed by the DVD lesson. Dinner is **free** to everyone who comes.

Barnett Chapel
Between Elberfeld and
Lynnville on Stanley Road
1/2 Mile West of
Weyerbacher Rd.

DATES

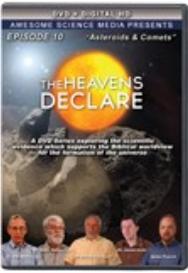

Wednesdays
Starting
January 5, 2022

TIME

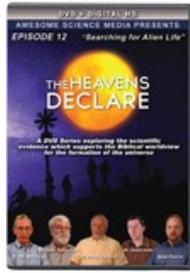

Dinner: 6:00 PM
Video: 6:45 PM

Asteroids & Comets: The experts explore the history of asteroids and comets, showing evidence how they were a part of creation and not billions of years old.

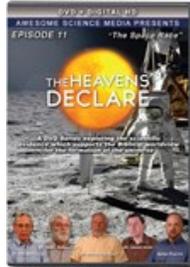

Searching For Alien Life: Explores why the search for aliens has resulted in failure and what is a Biblical worldview of aliens and extraterrestrial life.

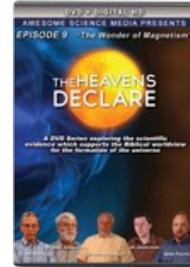

The Amazing Stars: Explores the stars in the universe, what makes up a star, how many there are, the distance of stars, and why they couldn't have formed in the Big Bang.

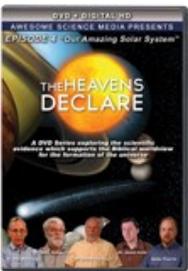

The Law Of Gravity: Explores the Law of Gravity and Relativity and how it showcases God's power and creativity for keeping the universe together.

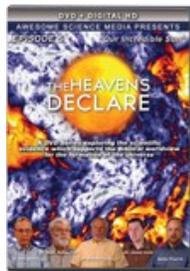

The Space Race: Explores the history of the American space program and how it glorifies God to search out the heavens.

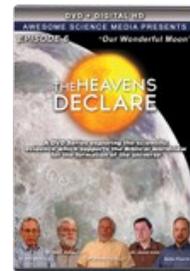

The Wonder Of Magnetism: Explores how magnetism is generated, why it's important for us, and how it shows our solar system is quite young, just as the Bible presents.

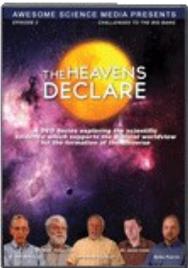

Our Amazing Solar System: Explores the amazing solar system we live in, designed by God in just a few days.

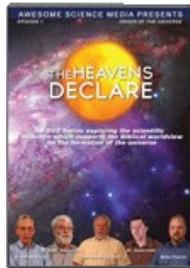

Our Incredible Sun: Explores the incredible sun God created on the fourth day of creation.

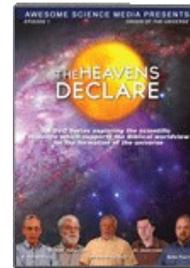

Our Wonderful Moon: Explores the wonderful moon God created on the fourth day of creation and how no known theory accounts for its existence except for creation.

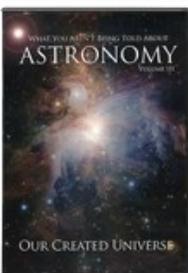

Challenges to the Big Bang: Explores scientific challenges to the Big Bang and its basic assumptions and then gives scientific evidence for the Biblical origins of the universe.

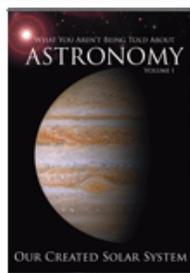

Origin of the Universe: Explore the different views and history about the origin of the universe and why we are here.

The Starlight Travel Dilemma: Explore how creation scientists use scientific methods and the supernatural to explain light travel.

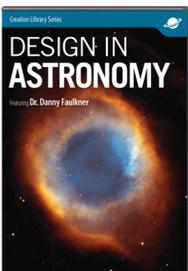

Our Created Universe: Our universe—what is its origin? Did it form in a big-bang event billions of years ago? Or are the heavens consistent with the biblical account of creation instead?

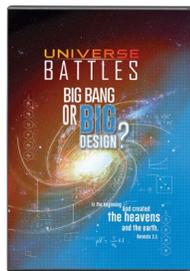

Our Created Solar System: Host Spike Psarris explores the solar system with hundreds of breathtaking photos and graphics, showing how the universe declares the existence of a Creator.

Our Created Stars and Galaxies: Host Spike Psarris explores the stars and galaxies with hundreds of breathtaking photos and graphics, showing how the universe declares the existence of a Creator.

Design In Astronomy: There are many features of the Earth and moon that make the earth ideally suited for life and humanity. Learn how the Earth is uniquely designed for life.

Universe Battles: Big Bang Or Big Design? Provides numerous observable evidences that the Solar System is not billions of years old. Includes interviews by six scientists.

17 Lessons Detailing The Biblical View of Astronomy and the Origin of the Universe
